

# SMART SMS – Multi SMS using SOAP Interface Technical Manual

---

## Introduction

This document provides the technical details of the SOAP based SMS API for the SMART SMS Engine Suite. This API is provided for customers to use any standard software development application to send SMS Messages through SMART SMS Gateway. This protocol is best suited for offline application who wishes to send messages by calling the function each time.

## How to Use the API

Any standard software development tool can be used to use the SOAP API which can consume a web service. The following are the steps required to send a message.

- Create an client by consuming the SOAP message using the WSDL provided
- Send the SOAP call to the http URL provided
- Receive the XML response and check the status of the request

## User Validation

User validation is done using the user id and password specified in the SOAP Request

## Programming Details

### SOAP Function

```
SendMessage(ByVal XMLData As String, ByVal UserID As String, ByVal Password As String) As String
```

## XML Tag for Sending

```
<SMS>
  <Messages>
    <Message>
      <MobileNumber>XXXXXXXXXMOBILE1, XXXXXXXXXMOBILE2, XXXXXXXXXMOBILE3</MobileNumber>
      <SenderID>XXXXXXX</SenderID>
      <Text>Msg1</Text>
      <Unicode>0</Unicode>
    </Message>

    <Message>
      <MobileNumber>XXXXXXXXXMOBILE4</MobileNumber>
      <Text>Msg2</Text>
      <Unicode>1</Unicode>
    </Message>
  </Messages>
</SMS>
```

## URL

The URL to include the SOAP Reference is :

<http://smartcall.ae/InContactSOAPV2/SubmitMultiSOAP.asmx>

## XML Tag Response

```
<?xml version='1.0' encoding='utf-8' ?>
<SMS>
  <Responses>
    <MessageResponse>
      <MobileNumber>XXXXXXXXXMOBILE1</MobileNumber>
      <SMSREF>2007XXXXXXXX</SMSREF>
      <Status>S</Status>
    </MessageResponse>
    <MessageResponse>
      <MobileNumber>97150xxxxxxx</MobileNumber>
      <SMSREF> XXXXXXXXXMOBILE2</SMSREF>
      <Status>S</Status>
    </MessageResponse>
  </Responses>
  <bStatus>Error</bStatus>
  <bError></bError>
</SMS>
```

## STATUS CODES - status Tag
